Clinical Management Programs

Traditional Prior Authorization

Each initial claim for the medications listed below will require review and authorization. If you would like to arrange for authorization for one of the medications listed below in advance, please call the Medco Prior Authorization (TPA) Service at (800) 753-2851. The Prior Authorization (PA) pharmacist will collect information in order to contact your physician or fax a copy of the authorization form to your physician.

- Zolinza
- Zorbtive
- Zytiga

* Authorization required for use in male patients

Smart Prior Authorizations

An automated system that tracks drug claims for each patient will review dosing thresholds, quantity thresholds, medications in claims history, patient age and other patient parameters. The SPA system pre-assesses the need for any further review or authorization. This program reviews the reason for which the patient is seeking coverage (1) for more than the usually allowed quantity or dose of medication over time or (2) in cases when evidence of prior therapy in a step approach is not found. If you need to arrange for additional quantities of medication under this program, please call the Smart Prior Authorization (SPA) Service at (800) 753-2851.
